We are all
writers ... 

We are growing
our learning 

BIG Question— How do I make good decisions? Equality, Dignity, Safety, Enterprise

SCARF Theme Before HT – Me and My Relationships . **SCARF Theme after HT**— Growing and Changing

Rights Respecting Schools

English

Literacy

We follow the Road to Writing structure to support our writing alongside Hammer the Grammar sessions and Word of the Day. This term, we will be exploring creative writing and conducting an immersive unit on the Titanic

Shared/Guided Reading

Within Literacy, we will focus on discussing texts that we have shared together and developing our understanding on what we have read by answering written and verbal questions. This term's focus for Guided Reading is looking at a range of texts and questions in preparation for SATS. Please also remember that reading at home is very effective at enhancing SATS reading paper fluency.

Handwriting

As a school we are focusing on improving our handwriting skills. We will be looking at improving our form and joined-up writing, ensuring consistency at all times.

Mathematics

Continuing our maths learning in our current groups, all pupils will be following a bespoke curriculum to prepare them for SATs and for making the best start at secondary school.

Topics will include but not be limited to:

Shape

We will be recapping the names of 2d and 3d shapes and covering work on angles. We will learn the total of internal angles in different shapes and the total of angles in a straight line and around a point.

Position and Direction

We will cover translation, reflection and co ordinates in four quadrants. We will practise performing translations and reflections on a grid.

Statistics

We will be looking at reading and interpreting types of graph—line graph, bar charts and pie charts. We will also create our own graphs to represent data they have collected.

Science

For this unit, we will be looking at our own lifestyles and what are contributing factors for keeping healthy. We will also look at aspects of life that aren't healthy and reasons why adults choose to include them in their lifestyles (cigarettes, vaping, alcohol, drugs) as well as the harm they can cause the body.

We will be also looking at why people may look like their parents and siblings. We then link this to the idea of heritage and also to animals (e.g. a Liger is the result of mixing a tiger and a lion) and how our domesticated cats have lion ancestors!

Finally, we will learn about fossils and Charles Darwin.

PSHE/SCARF

Relationships

In this unit, we will focus on getting along with others and managing and maintaining friendships. They will also reflect on ideas around bullying and the roles they can play in supporting and helping. Finally, they will learn about being assertive and standing up for themselves positively.

Growing and Changing

In this unit, we will continue to learn about puberty and issues that arise as we grow up. We will think about stereotypes, media and online pressure and body confidence. Finally, we will learn how a baby is conceived and develops in the womb until birth.

History

Pupils will continue to take part in learning from the school's heritage project, One Square Mile. They will be focusing on what the Romans left us, going out on visits to find evidence and memorials from this time as well as learning in school to add to their understanding of Colchester's heritage.

MFL

In Spanish, we will be studying 'My Home'. The children will learn key vocabulary, and use sentence stems to explain things in the home both verbally and written.

Computing

The children will be learning about the uses and applications of artificial intelligence. They will use a site about Machine Learning to allow them to explore models and then they will use coding and AI to create a program that enables a computer to learn how to recognise images.

Geography

In Geography we are learning to use the eight compass points and to read and create maps. This will allow the use of more focused and precise positional language . We are also learning how to use maps and the specific coordinates used in atlases also known as the Eastings and Northings. Finally, we will be looking at a range of maps including OS maps to learn more about St. John's Green in relation to other places in Colchester.

Music

This term, children will be preparing performances for the end-of-year production. They will build on their skills singing as a group, developing awareness of performance skills, and singing a Year 6 Leavers' song.

Religious Education

This term, we will be learning about Islam and the lived experiences of Muslims. We will consolidate previous learning and deepen our understanding of what it means to be a Muslim and how this guides the way a Muslim lives their life.

Design and Technology

This term, children will be practising their sewing skills and designing and making a miniature waistcoat. Following our Titanic theme, the children will explore clothing from the period of history.

PE

During this term, Children will be playing rounders, football and badminton to practise specific PE skills and techniques as well as tactics and teamwork. Later in the term, they will focus on Athletics and benefit from visits to the Garrison track.

Art

This term, the children will be creating and exploring Roman Art and creating Mosaics inspired by the rich history of Colchester's Roman past.
